BRIEF HISTORY

The Tandag City Water District is a government owned and controlled corporation which operation is in accordance with Presidential Decree 198, also known as the Provincial Water Utilities Act of 1973. It was on June 4, 1979 that the District was created thru a Sangguniang Bayan Resolution, strengthened by Conditional Certificate of Conformance No. 105 awarded by the Local Water Utilities Administration (LWUA).

The District was authorized to take over the ownership and management of the first water supply system in the locality, managed and operated by then municipal government of Tandag. However, it mostly supplied only the poblacion area.

Hence the District constructed a water supply system improvement project called the Phase I Project that supplied the barangays of Quezon, Bioto, San Agustin Sur, Dagocdoc, Bongtud and Bag-ong Lungsod. The Phase II Project supplied additional barangays such as Awasian, Telaje, Mabua, Rosario, Salvacion, San Agustin Norte, Pangi and Buenavista. Brgy. San Antonio was added just last year.

As of FY2021, TCWD now supplies 9,921 active service connections which is equivalent to 49,605 people.

FOREWORD

The highest quality service our customers receive is vital, and a purpose to which Tandag City Water District is committed. That is why in the face of unprecedented climate and environmental change and financial challenges, we strive to deliver on our promise of potable water 24/7 for the benefit of all the people in Tandag.

The District as a public utility will not just continue to look for additional sources to ensure adequate supply but to couple it with the best service of its personnel through its core values such as integrity, accountability & public trust.

This citizen's charter is a document that details all TCWD frontline services, including step-by-step procedures showing the requirements, time, and fees involved for customers to get what they need, in the most effective and efficient way. And as we consider all customers as partners, letting us know how we have served them by evaluating our performance through the feedback form will be of great help to us.

EULOGIO D. MILLA, CE, ASEAN Eng
General Manager

POWERS & FUNCTIONS

1. Acquisition of Waterworks

A district may purchase , construct or otherwise acquire works, water, water rights, land, rights and privileges useful or necessary to convey, supply, store, collect, treat, dispose of or make other use of water for any purpose authorized by this Title. In the acquisition of water or water rights the district shall cooperate with existing agencies of the government of the Philippines. (Sec. 5 of PD 1479)

2. Sale of Water

The district shall have the power to sell water, pursuant to generally applicable rules and regulations, to any person for use within district. As a condition of such sale, the district may require the filing of a written application for service, payment of established charges or deposits and execution of a water service contract.

A district may provide service to public faucets or hydrants provided that it shall first have executed an application and service contract with the Government entity to establish or maintain such faucets or hydrants within district. The district will be paid for such service in the same manner as regular domestic service and pursuant to the adopted rules and regulations of the district.

Any district holding a valid Certificate of Conformance or a Conditional Certificate of Conformance from the Administration shall be exempt from regulation by the Public Service Commission or its successor. (Sec. 5 of PD 1479)

3. Sewerage.

A district may require, construct, operate and furnish facilities and services, within or without the district, for the collection, treatment and disposal of sewerage, waste, and storm water. The district may only furnish such services outside the district by means of facilities designed primarily to serve inside the district. Upon providing a sewer system in any area of

the district, the district may require all buildings used by human beings to be connected to the sewer system within such reasonable time as may be prescribed by the district, provided that the property upon which such building to be connected stands is located within 35 meters of an existing main of the district's sewer system. After due notice thereof and refusal on the part of the property owner to so connect with the district's sewer system, the district may declare the further maintenance or use of cesspools, septic tanks, or other local means of sewerage disposal in such area to be a public nuisance and, after notice in writing of at least 10 days, deprive said property owner of any and all services provided by the districts, which sanction may be co-extensive with the period during which the property owner persists in refusing to connect with the district's sewer system. (Sec. 5 of PD 1479)

4. Rights of Way.

The right of way is hereby granted to locate, construct and maintain works of the district on any land which is now, or hereafter may be, owned by the Government of the Philippines or by any of its political subdivisions, and/or instrumentalities. A district may construct any works along, under or across any street, watercourse, railway, or conduct in any manner which will afford security for life and property: *Provided*, that in planning any such works, the environmental aspects shall also be considered. (Sec. 5 of PD 1479)

5. Contracts.

– A district shall have the power to enter into contracts with any person for the purpose of performing any functions of the district: *Provided*, that the Board of Directors may not by contract delegate any of the discretionary powers vested in the board by this Title. Specifically, but without limiting said general power, a district may enter into the following contracts:

- (a) **Cooperation.** – Agreement with the Government of the Philippines or any of its agencies or political subdivisions for the cooperative or joint performance of any function of the district.
- (b) **In- Lieu Share.** – As an incident to the acquisition of the existing water system of a city, municipality, or province, a district may enter into a contract to pay in-lieu share for such utility plant, an annual amount not exceeding three percent (3%) of the district's gross receipts from water sales in any year: *Provided*, however, That no contract of this nature shall be executed during the first five years of the existence of

the district; and *Provided Further*, That the Board of Directors shall determine that such contract will not adversely affect or impair the fiscal position and operations of the district as verified by the Administration. (As amended by Sec. II, PD 768; Sec. 5, PD 1479)

6. Protection of waters and facilities of the District.

– A district shall have the right to:

- (a) Commence, maintain, intervene in, defend and compromise actions or proceedings to prevent interference with or deterioration of water quality or the natural flow of any surface, stream or ground water supply which may be used or useful for any purpose of the district or be a common benefit to the lands of its inhabitants. The ground water within a district is necessary to the performance of the district's powers and such district is hereby authorized to adopt rules and regulations subject to the approval of the National Water Resources Council governing the drilling, maintenance and operation of wells within its boundaries for purposes other than a single family domestic use on overlying land. Any well operated in violation of such regulations shall be deemed in interference with the waters of the district.
- (b) Require a developer or builder of any structure within the service areas of the district to extend or connect its pipeline facilities to the district facilities whenever such development or structure is within one hundred meters of existing district facilities or whenever the district is willing to extend its facilities within one hundred meters of said development or structure. For the purpose of this section, development shall include the subdivision of land for any purpose other than agricultural purpose, and structure shall mean any building or facility to be used for residential, Commercial or industrial purposes.
- (c) Prohibit any person, firm or corporation from vending, selling, or otherwise disposing of water for public purposes within the service area of the district where district facilities are available to provide such service, of fix terms and conditions by permit for such sale or disposing of water.
- (d) Safeguard and protect the use of its waters. For this purpose, any person who installs any water connection without the previous authority from the water district established under this Decree; tampers water meters or uses jumpers or other devices whereby water is stolen; steals or pilfers water of water meters; knowingly possesses stolen or pilfered water or water meters shall, upon conviction, be punished by *prision correctional* in its minimum period or a fine ranging from two thousand

pesos to six thousand pesos, or both. If the violation is committed with the connivance or permission of an employee or officer of the water district, an employee or officer shall, upon conviction, be punished by a penalty one degree lower than *prision correctional* in its minimum period and forthwith be dismissed and perpetually disqualified from employment in any utility or service company owned or controlled by the government. (Sec. 12 of PD 768)

- (e) Take over the management, administration, operation and maintenance of all watersheds within its territorial boundaries. (Sec. 6 of PD 1479)

7. Fire Protection Capacity.

– The district may install and maintain pipeline capacity and additional hydrants for fire protection purposes: *Provided*, That prior agreement has been executed with the public entity having principal fire protection responsibility within the district whereby the district will be reimbursed over the reasonable life of said facilities for the cost of installation and operation of such fire protection capacity and facilities. (Sec. 7 of PD 1479)

VISION, MISSION & CORE VALUES

Vision

A sustainable utility to deliver safe and affordable water supply through protection of watersheds and preservation of the environment for Tandag City's ecological balance.

Mission

To adequately address the need for potable and affordable water under conditions of efficient and effective human and natural resource administration by increasing capability to develop and maintain the ecology relative to global mitigation of climate change

Core Values

Integrity. We value integrity in our day to day operation and treat our customers in an honest, ethical, responsible and respectful manner.

Accountability and Transparency. We value accountability for our actions in carrying out all TCWD's operations and transparency in terms of communicating openly our policies, processes, plans and programs.

Growth and Development. We value growth and development of our team workers to maximize their potentials for the assurance that they can provide the highest quality service to our customers. We ensure that the successes and abilities of each employee are recognized.

Teamwork. We value working together as team and share information and resources to attain our collective goals. We value the differences of each individual employee and treat them with respect and dignity.

Public Trust. We value public trust and confidence. We shall maintain and enhance them through demonstrating excellence in the services we deliver to satisfy our customer's needs.

STRATEGIC GOALS

To maintain and upgrade the water distribution system and facilities.

To improve the quality and reliability of water through maintaining the responsible stewardship of water sources' forest covers

To provide high quality customer service

To strengthen human resource administration, thereby increasing productivity, employee retention and morale.

To improve linkages and networking within the organization.

PERFORMANCE PLEDGE

We, the officials and employees of Tandag City Water District commit to provide and efficiently serve our customers with safe, potable water that conforms to the standards set by the Philippine National Standards for Drinking Water. We shall strive to increase customer satisfaction by continually improving the quantity and quality of water we deliver, including our systems and facilities.

FEEDBACK & REDRESS MECHANISM

Please let us know how we have served you by doing any of the following:

- Accomplish our Feedback Form available in our office and put it in the suggestion box in the customer service desk or email at tandag_water_district@yahoo.com.ph
- Talk to our Officer of the Day/Public Assistance Complaints Desk in-charge
- or write to Eulogio D. Milla, CE, ASEAN Eng– General Manager

If you are not satisfied with our service, your written/verbal complaints shall immediately be attended by the Officer of the Day at the PACD table. You can also send feedback in case you are contented with the services we provide.

Thank you very much for helping us to continuously improve our service.

The TCWD personnel who responded to the concern were courteous and approachable

The personnel/in-charge was able to clearly explain the details surrounding the incident/concern.

Response time from the time of concern up to the time of action was fast.

The services rendered were fair, honest and just.

The workplace is clean and organized.
